

Sebastião Santos Lessa

GenAI Engineer / Machine Learning Engineer

 Seblessa  Sebastião  sebastiao2002@gmail.com  (+351) 915 196 240

GenAI engineer bridging applied research and production delivery across LLM agents, backend APIs, cloud infrastructure, and time series modelling.

EXPERIENCE

MINSAIT, AN INDRA COMPANY

GenAI Engineer through GRIT Solutions

Jul 2026 to Present | Hybrid

- Build **GenAI systems** spanning backend services, cloud infrastructure, and enterprise workflows for **Minsait** through **GRIT Solutions**.
- Contribute reusable GenAI capabilities to **GRIT Solutions' internal AI initiatives** alongside client delivery.

DELOITTE PORTUGAL

GenAI/ML Engineer

Sep 2025 to Jun 2026 | Hybrid

- Built and deployed **enterprise GenAI and ML services** across **AWS** and **GCP**, integrating model inference, backend APIs, cloud infrastructure, and CI/CD workflows.
- Developed **FastAPI services** and **stateful agentic workflows** for LLM use cases, with structured tool calls and integrations with internal backend systems.

INESCTEC

Machine Learning Researcher

Sep 2024 to Aug 2025 | Hybrid

- Conducted research on **LLM agents**, **foundation models**, and **time series forecasting**, with emphasis on model adaptation under dynamic data regimes.
- Published at **IEEE PowerTech 2025**: *Synthetic Data Generation for Time Series Imputation: Comparing the Foundation Model Chronos with Established Methods*.

ZERO TO ADVANCED ARTIFICIAL INTELLIGENCE

Machine Learning Intern

Mar 2024 to Aug 2024 | Remote

- Evaluated and implemented **deep learning architectures** for time series forecasting, utilizing **transfer learning** to enhance model performance.

REDE CAPITAL SOCIAL

Full Stack Web Developer

Jan 2024 to Aug 2024 | Remote

- Developed and deployed a **scalable full-stack web application** on **Google Cloud Platform**, handling end-to-end cloud infrastructure configuration.

EDUCATION

UNIVERSITY OF PORTO

Faculdade de Engenharia (FEUP) & Faculdade de Ciências (FCUP)

MSc in Artificial Intelligence

2024 to 2026

Thesis (18/20): **Transformer-Based Adaptive Drift-Aware Anomaly Detection for Energy Consumption Time Series Using Forecasted Normal Behaviour**

BSc in Artificial Intelligence and Data Science

2021 to 2024

SELECTED PROJECTS

- EnerTEF**: Developed and validated AI tools for energy analytics and forecasting within an INESC TEC European initiative.
- AlphaZero**: Built a self-play reinforcement learning system for Go and Ataxx.

SKILLS

PROGRAMMING

- Python & Pandas
- PyTorch & Scikit-learn
- FastAPI & Async APIs
- LangChain & LangGraph
- Google ADK & LLM Tooling

CLOUD & OPERATIONS

- AWS** (EC2, EKS)
- GCP** (Cloud Run, GKE)
- Docker & Containerization
- CI/CD & Deployment
- Git & Version Control

CORE COMPETENCIES

- Production GenAI Systems
- LLM Orchestration & Tool Calling
- Agentic Workflows & Multi-Agent Systems
- RAG & Semantic Retrieval
- LLM Evaluation & Guardrails
- Time Series Forecasting

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- Google Cloud Digital Leader
- Google Associate Cloud Engineer

AWARDS

1ST PLACE • 2023

HACKATHON

Critical TechWorks and NUCC
DCC, FCUP, Porto

LANGUAGES

Portuguese (Native)

English (Proficient)

INTERESTS

 Video games

 Cinema and TV shows

 Competitive water polo:
national champion with Clube Fluvial Portuense.
